

In situ trials

2014

Eolien Maritime France - EMF project (trenching trials)

As part of preparation of the call for tenders for the construction works of french offshore windfarms, Eolien Maritime France (EMF) has awarded to LOUIS DREYFUS TRAVOCEAN the performance of trenching trials on 3 sites of Fécamp, Courseulles and Saint-Nazaire (French).

These trials were used to evaluate and quantify the performance of different trenching tools in various soil conditions and to deduce a protection methodology for the future infield cables of these windfarms.
